

## Aim & Scope

The essence of the symposium lies in the contribution of the understanding and promotion of critical and analytical thinking and the establishment of its systematic structure along with sharing obtained scientific results with the scientific communities and all interested bodies.

Critical and analytical thinking revises our mental thinking structure, which affects our judgments and actions, through transforming its superficial, ordinary and easily affected structure to the systematic, multi-faceted and interrogative one.

Those people thinking in critical and analytical way consider every aspects of a topic and obtain a full vision about it. They are quite aware of the possible misleading structures of internal or external factors. They can distinguish right from wrong and reach a correct decision on a subject by pursuing the necessary and accurate information. A new conversion of life perspective of awareness in all aspects may be obtained by adapting and applying critical and analytical thinking. Symposium topics are determined to hold a mirror to life from the perspective of critical and analytical thinking and show its projection to the real life.
