## IS on REFID 2019

### 1<sup>st</sup> INTERNATIONAL SYMPOSIUM ON REAL ESTATE FINANCE, INVESTMENT AND DEVELOPMENT

Dearest Real Estate Market Leaders, Members of the Scientific and Academic World and Colleagues,

International Research Symposium on Real Estate Finance, Investment and Development is a multidisciplinary and collective organization arranged by the Istanbul Commerce University, dedicated to bringing together a significant number of diverse real estate market people and scholars and with their events and studies for presentations on Real Estate Development, Investments, Finance and the Blockchain Algorithms and Solutions together within the conference program. Upcoming events, presentations and poster sessions will be held in Istanbul on 19-20 June 2019 under the auspices of Istanbul Commerce University and Istanbul Commerce Chamber. Our university provides graduate and doctoral programs arranged within the institutions of Engineering and Science on Real Estate Development, Urban Renewal and Planning to analyze the Real Estate related issues in Turkey and world. Additionally, the Real Estate Development and Research Center established in our university also carries out its activities successfully on real estate subjects.

As recent colossal changes in the areas of Real Estate Development and Finance, the research world is also confronted by the developments of Blockchain on top of the latter subjects. Emerging markets are under the tests of Environmentalism and Sustainability on the development side, which set significant and challenging standards on the developments of Real Estate, Construction and Infrastructure projects in Turkey. These very fundamental issues are also touched by the challenges of Finance and Technological Developments, such as Blockchain. Surrounded by these mainstream global trends, our country should be in a position to lead these developments rather than wait and see the ongoing structural changes on those areas. New innovative solutions like Real Investment Trusts, Funds and Islamic Funding Instruments such as "Sukuk" should be re-evaluated within the context of new technologies such as Blockchain and Finance.

In this sense, we are pleased and honoured by your participation in the International Symposium on Real Estate Finance, Investment and Development (REFID) 2019 at our encounters of Istanbul Commerce University. We look forward to welcoming you to Sütlüce campus in Istanbul in June to extend your vision on these fundamental subjects and to make you a partner on our projects

#### Chairmen

**Prof. Dr. Thorsten HENS**

**Dr. Oec. Publ. V. Ferhan BENLİ**
